

Wine is one of the most civilised things in the world and one of the most natural things of the world that has been brought to the greatest perfection, and it offers a greater range of enjoyment and appreciation than, possibly, any other purely sensory thing.

### FRANCE

#### BURGUNDY

The reputation of this region's wines, whose pedigree was first established by the Grand Dukes of Burgundy, has never faltered. It is this hallmark of excellence that unites the multitude of different wines to be found in this vast and many-faceted province. About 200 million years ago, the region was part of a vast, tropical sea which created limestone soils. These are the secret behind the zesty minerality that is the hallmark of Burgundy wines.

#### CHABLISIEN

The vineyards of the Yonne stretch from Chablis to Auxerre. With the vineyard area around Chablis being the largest and most famous part, Chablis has, in fact made a worldwide reputation for itself, to the point where its name has become synonymous with the very best dry white wines.

<b>AUSTRIA</b>			
Gut Oggau is a project in the small town of Oggau in Burgenland, Austria. This was started by Eduard and Stephanie Tscheppe in 2007. They painstakingly restored the 17 <sup>th</sup> century winery that had been abandoned for 20 years, including its 200-year old screw press. The vines' 20-year period of neglect was fortunate as this allowed all the pesticides and chemical treatments to be washed away. This let them begin working immediately on the vines bio dynamically, where they are now fully demeter certified.

## ROSÉ WINE

Whether it's Rosé, Rosado, Rosato or Blush – these terms all refer to pink wine. This pink shade can range from a soft, subtle hue to a vibrant hot pink, depending on the grape used and how long the grape skins were in contact with the Rosé juices. This can be made into a sweet, off-dry or bone dry style with most European Rosé being decidedly dry.

Gut Oggau is a project in the small town of Oggau in Burgenland, Austria. This was started by Eduard and Stephanie Tscheppe in 2007. Restoring the 17 <sup>th</sup> century winery that had been abandoned for 20 years, including its 200-year old screw press. The vines' 20-year period of neglect allowed all the pesticides and chemical treatments to be washed away, which let them begin working immediately on the vines bio dynamically, now fully Demeter certified.
